Statement of Memory Volatility for DMC-VID-RCA-A

The DMC-VID-RCA-A is an input card for a Crestron DigitalMedia™ Switcher, providing one analog video input and one stereo analog input. It uses the following memory types: EEPROM, SRAM and FLASH PROM. The memory used in this unit holds only firmware, operational parameters and user presets. No user audio/video data is retained in memory upon power down.

See table below for memory type and Volatility:

MEMORY TYPE	VOLATILITY	USER DATA
EEPROM	Non-Volatile	NO
FLASH PROM	Non-Volatile	NO
SRAM	Volatile	NO
