

Statement of Memory Volatility for DMC-CATO

The DMC-CATO is an output card for a DigitalMedia™ Switcher, providing four DigitalMedia (DM) outputs to feed up to four individual DM receivers via CAT5e/6 or DigitalMedia cable. It uses the following memory types: EEPROM, FLASH PROM and SRAM. The memory used in this unit holds only firmware, operational parameters and user presets. No user audio/video data is retained in memory upon power down.

See table below for memory type and Volatility:

MEMORY TYPE	VOLATILITY	USER DATA
FLASH PROM (CPU)	Non-Volatile	NO
FLASH PROM	Non-Volatile	NO
SRAM (CPU)	Volatile	NO
