

Statement of Memory Volatility for DM-MD16X16-RPS

Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off Note 1	User data Note 2	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1.EEPROM	128 kilo Bits	Device Config CPU - Device settings	Yes	No	Special software required	Software
2.FLASH PROM	16 Mega Bytes	Firmware CPU	Yes	No	Special software required	Software
3.SDRAM	256 Mega Bytes	Temporary Storage CPU	No	No	Special software required	N/P
4.FLASH PROM microController	512 kilo Bytes	Firmware Front Panel	Yes	No	Special software required	Software
5.SRAM microController	32 kilo Bits	Temporary Storage Front Panel	No	No	Special software required	N/P

Note 1: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet retain after power down?

Note 2: Can user data, i.e. Audio or Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.

Thomas Fald
