

Home Conferencing

Why Home Conferencing?

- **Video conferencing isn't just for work anymore**
- **Home Conferencing is the new normal**
- **Working, learning, and socializing from home**
- **Need more permanent, professional solutions**

“Work and Learn from Anywhere” Transformation is an Opportunity for Dealers

**2.7B meeting minutes on
March 31**

**From 10M to 300M daily
users**

**Solutions for Home
Conferencing**

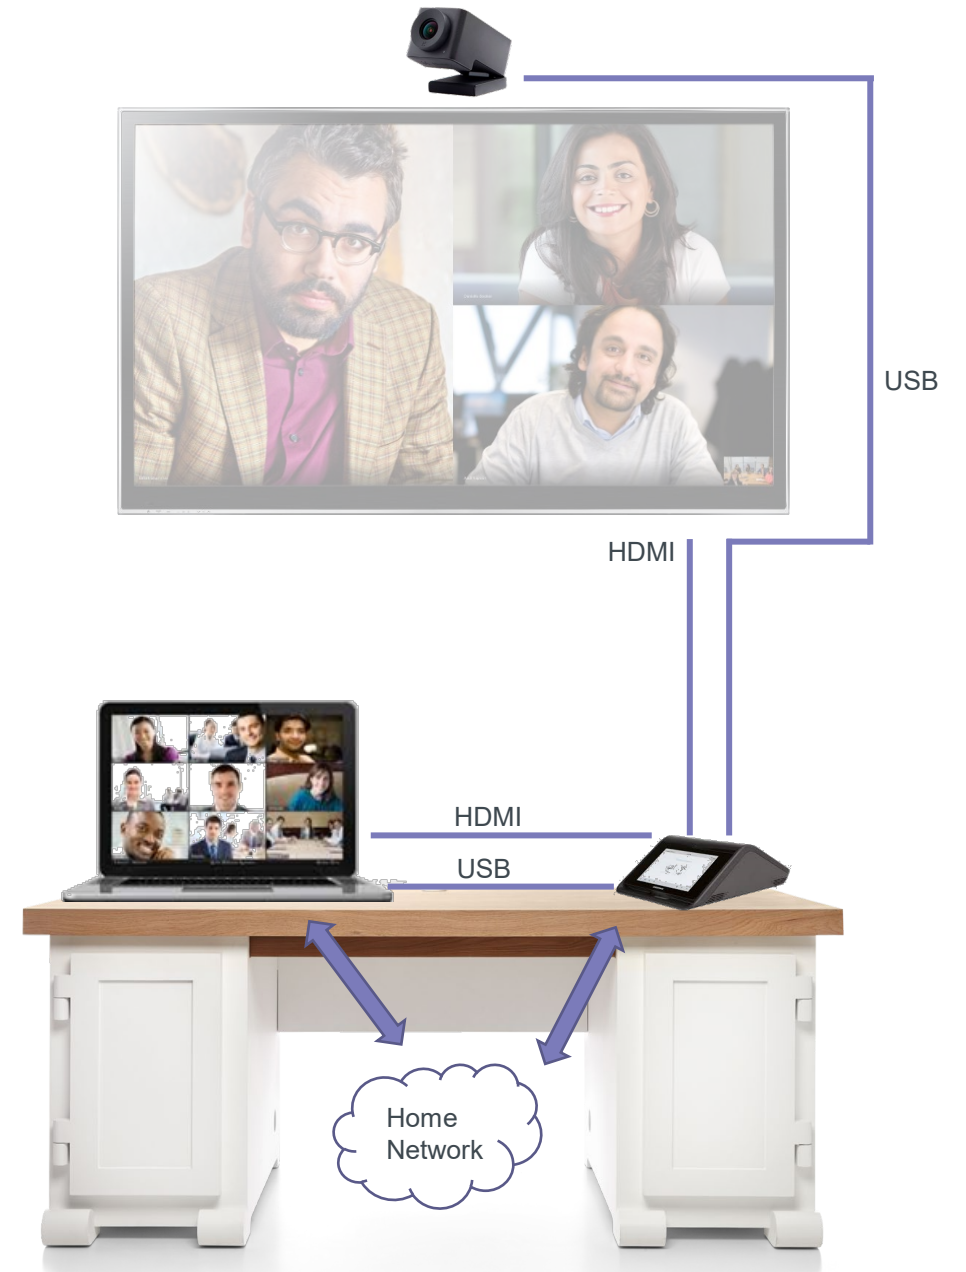

Bringing Conferencing Expertise Home

- **Leveraging our experience in enterprise conferencing and collaboration to bring professional-quality conferencing systems into the home**

On Your Desktop

- **CCS-UC-1-X**
- **All-in-one professional conferencing solution that sits on your desk**
 - Four microphone array, speaker, touch screen, wireless hub, USB/HDMI, and Bluetooth®
 - Wired and wireless display extension to the TV
 - Universal web conferencing
 - Just works with Microsoft Teams®, Zoom Rooms™, Slack, Google® Meet, or whatever is running on the laptop or mobile device
 - Have amazing audio and video quality in your home office without using your laptops audio or camera
 - Intelligent auto-framing camera
 - Great for Bluetooth pairing for mobile phone
 - Use it for calls and music

On the desktop – “Do not disturb” option

- **SIW-100 & HTT-B2EX-BATT**

- Mount light outside the door
- Wireless 2-button switch sits discreetly on the desk

- **Turn the light “ON”**

- Illuminates **RED** letting the family know you’re on a call and “do not disturb”

- **Turn the light “OFF”**

- Turns off when you’re not on a call

- **Add-on or stand-alone**

- Add to any existing 3-Series based system
- Stand-alone with a simple control system (e.g. RMC3)
- Link 3-Series® to Crestron Home™ control system

At the TV

- **AM-200**
- **Wireless display extension**
 - Send your laptop or mobile content to your TV over the home network
 - Personalize the TV
 - Add personalized images to the background
 - Fits neatly behind the TV

At the TV – Universal web conferencing option

- **UC-SB1-CAM + wall plate USB extenders**
- **Universal web conferencing**
 - Amazing audio and video quality on any TV in the home rather than relying on the display, camera, microphone, and speaker on personal devices
 - Smart Soundbar Installs neatly at the TV
 - Wall plates install neatly behind the TV and beside a couch, chair, table, or desk to connect a laptop via USB

Crestron HomeTime™ Conferencing System

- **HT-CAM**
- **Zoom from the comfort of the couch**
 - Wide angle camera makes it easy for everyone in the frame
 - Full-duplex, advanced beamforming microphone enables natural conversation
 - High-performance speaker delivers exceptional audio
- **Integrated remote control**
 - Turn on TV
 - Start/join Zoom™ meetings
 - Control volume, camera, lights, shades, thermostats, etc. from the same remote

Crestron HomeTime™ - Additional Rooms Option

- **HT-CAM-AUX**
- **Zoom from any TV**
 - Crestron HomeTime video conferencing “engine” can be located remotely
 - Easily route meetings to TVs in other rooms using DM NVX® AV-over-IP technology

Crestron Home Conferencing

- **Working, learning, socializing from anywhere**
- **Leveraging our expertise in the enterprise space**
- **Permanent, professional collaboration solutions for the home**
- **Standalone or integrated with Crestron and Crestron Home systems**
