

DM-RMC-4K-SCALER-C/DM-RMC-4K-SCALER-C-DSP 4K DigitalMedia 8G+® Receiver and Room Controller with Scaler

DO Install the Device

The Crestron® DM-RMC-4K-SCALER-C and DM-RMC-4K-SCALER-C-DSP can be mounted onto a flat surface or onto a rack rail.

Mounting onto a Flat Surface

Using four mounting screws (not included), mount the device onto a flat surface such as a wall or a ceiling.

Mounting onto a Wall

Mounting onto a Rack Rail

The DM-RMC-4K-SCALER-C and DM-RMC-4K-SCALER-C-DSP mount onto the front or rear rail of a rack. Position either the left or the right mounting flange of the device so that the holes align with the holes in the rack. Then, secure the device to the rack using two rack mounting screws (not included).

Mounting onto a Rack Rail

DO Check the Box

QTY	PRODUCT	PART NUM.
2	Connector, 4-Pin	2003576
2	Connector, 5-Pin	2003577
1	Power Pack, 24 Vdc 1.25 A, 100-240 Vac	2045870

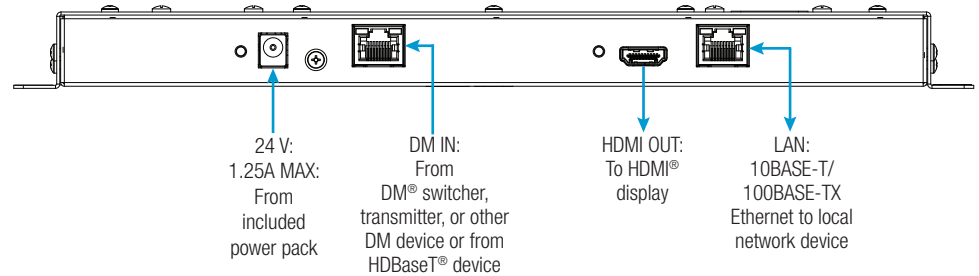

DO Connect the Device

Connect the device as required for the application.

Connections, Left Side

Connections, Right Side

NOTE: The DM IN port is a PoDM+ powered device (PD) port and is also compatible with HDBaseT® PoE+. In order for the device to receive PoDM+, the device requires connection to a DigitalMedia™ switcher or other equipment that has a PoDM+ power sourcing equipment (PSE) port. In order for the device to receive HDBaseT PoE+, the device requires connection to equipment that has a corresponding HDBaseT PoE+ PSE port. Any wiring that is connected to a PoDM+ or HDBaseT PoE+ PSE port is for intrabuilding use only and should not be connected to a line that runs outside of the building in which the PSE is located.

Connection to the included power pack is not required when PoDM+ or HDBaseT PoE+ is used to power the device.

NOTE: Connection of the CEN-SWPOE-16 to the POE IN ports of DMC-4K-CO-HD output cards in a DigitalMedia switcher can provide PoDM+ power to up to seven DM-RMC-4K-SCALER-C devices.

NOTE: The LAN port can connect to an Ethernet switch only if the DM IN port does not connect to a DigitalMedia switcher.

For information about AUDIO OUT, LAN, and DM IN pin assignments, refer to the following illustrations.

AUDIO OUT Pin Assignments

SIGNAL NAME	BALANCED AUDIO OUTPUT	UNBALANCED AUDIO OUTPUT
+	L+	L+ Out
-	L-	Open
G	Shield/Ground	Common Ground
+	R+	R+ Out
-	R-	Open

Balanced Output

Unbalanced Output

LAN Connector Pin Assignments

PIN NUM.	SIGNAL	PIN NUM.	SIGNAL
1	TX+	5	N/C
2	TX-	6	RX-
3	RX+	7	N/C
4	N/C	8	N/C

DM IN Wiring

PIN NUM.	WIRE COLOR	PIN NUM.	WIRE COLOR
1	Orange/White	5	Blue/White
2	Orange	6	Green
3	Green/White	7	Brown/White
4	Blue	8	Brown

DO Set the IP Address

The configuration of the receiver within the DigitalMedia 8G+® system determines how the IP address of the receiver is set:

- If the receiver connects to a DigitalMedia switcher, the receiver is configured by the switcher automatically.
- If the receiver connects to a DigitalMedia 8G+ transmitter, the receiver uses its own configuration settings. By default, DHCP (Dynamic Host Configuration Protocol) is enabled. If assignment of the default IP address to the receiver is desired, hold down the **SETUP** button while the unit boots up. The default IP address overwrites the current setting. The default IP address of the DM-RMC-4K-SCALER-C is 192.168.1.221, and the default IP address of the DM-RMC-4K-SCALER-C-DSP is 192.168.1.222. To manually set a different IP address, use Crestron Toolbox™ software.

DM-RMC-4K-SCALER-C

DM-RMC-4K-SCALER-C-DSP

As of the date of manufacture, the product has been tested and found to comply with specifications for CE marking.

This product is Listed to applicable UL® Standards and requirements tested by Underwriters Laboratories Inc. Ce produit est homologué selon les normes et les exigences UL applicables par Underwriters Laboratories Inc.

This unit is for indoor use only. It is not intended for outdoor use.

Cet appareil est réservé à une utilisation en intérieur. Il n'est pas destiné à une utilisation en extérieur.

Federal Communications Commission (FCC) Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
