The Crestron® CCS-UC-1-X provides video conference capabilities to a conference room.

In the Box

1	CCS-UC-1-X, Crestron Mercury® X Tabletop UC System

Additional Items

|	
1	Cable, USB 2.0, A - Micro B, 6 ft (1.83 m) (P/N 2047803)
1	Cable, HDMI®, Thin, 6 ft (1.8 m) (P/N 6508218)
1	Cable, CAT5e, RJ-45 Male - RJ-45 Male, 12 ft (3.66 m) (P/N 2033988)
1	Retention Plate, Cable (P/N 2047908)
3	Tie Wrap (P/N 2047935)
1	Power Pack, 24 VDC, 2.5 A, 100-240 VAC (P/N 2045873)
1	Power cord (varies by location)

Install the Cable Retention Plate

The cable retention plate provides tie-down points for cables that are connected to the device.

Remove the adhesive backing from the cable retention plate and install it on the underside of the CCS-UC-1-X as shown in the following diagram.

CAUTION: When turning over the device, place the device on a soft surface to avoid damage.

NOTES:

- If the CCS-UCA-SMK swivel mount kit is to be used, use the cable retention bracket included with the CCS-UCA-SMK. For details, refer to the CCS-UCA-SMK DO Guide (Doc. 7882) at www.crestron.com/manuals.

- Before securing cables, ensure the cable retention plate is firmly attached.

Cable retention plate installed

Connect

Make connections to the CCS-UC-1-X.

Make Connections

When making connections, it is highly recommended to use the cables shipped with the device. The cables and accessories have been designed so that a service loop can be implemented prior to the cables leaving the chassis body of the device (if necessary). If an extension option is required, Crestron solutions should always be used and can be found under **MODELS & ACCESSORIES** on the Crestron Mercury X web page.

Route Cables

CCS-UCA-SMK Swivel Mount Kit

If the CCS-UCA-SMK swivel mount kit is used in the installation, refer to the CCS-UCA-SMK DO Guide for installation instructions (Doc. 7882).

> **NOTE:** Do not route the HDMI and USB cables through the swivel tube.

USB and HDMI Cables

Insert the included USB and HDMI cables into the appropriate cable channels on the underside of the CCS-UC-1-X.

Route USB cable here

Route HDMI cable here

> **NOTE:** If the system design dictates that the USB and HDMI Input cables should not exit through the front but at the rear with all other cables, the USB and HDMI input cables should be bundled and secured to the cable retention plate on the underside of the CCS-UC-1-X. Make sure to leave enough cable for a 2- to 3- inch service loop before exiting the rear of the device.

Power, Ethernet, HDBaseT, and Other Cables

Bundle the Ethernet, HDBaseT, and other cables together and use a provided tie wrap to secure the bundle to one of the positions on the cable retention plate.

⚙ Configure Settings

For details on configuring the device, refer to the CCS-UC-1 Product Manual (Doc. 7844).
