C2N-DBN12

Decorator Numeric Keypad

> A decorator-style wall mount keypad with 12 buttons
> Includes pre-labeled button caps for numeric entry applications
> Red LED feedback indicators
> Fits standard electrical gang boxes and faceplates
> Available in smooth almond, black, and white finishes
> Cresnet® wired communications

The Decorator Series C2N-DBN12 Numeric Keypad is an optional complement to the C2N-DBF12 Function Keypad, allowing for enhanced control of a Crestron® Multiroom AV distribution system with direct numeric entry for the selection of channels and tracks. It also works well for pass code entry applications.

The C2N-DBN12 is identical to the C2N-DB12 12-Button Decorator Keypad except that it includes a set of 12 button caps pre-labeled for numeric entry applications.

Please note, the almond smooth (-A-S) and white smooth (-W-S) finishes currently offered are not the same as on older almond (A) and white (W) models. When ordering, please be sure to specify the model number exactly as shown in the price list or on the "Models & Accessories" tab. If you require buttons or keypads to match the older almond or white finishes, please contact your Crestron representative.
