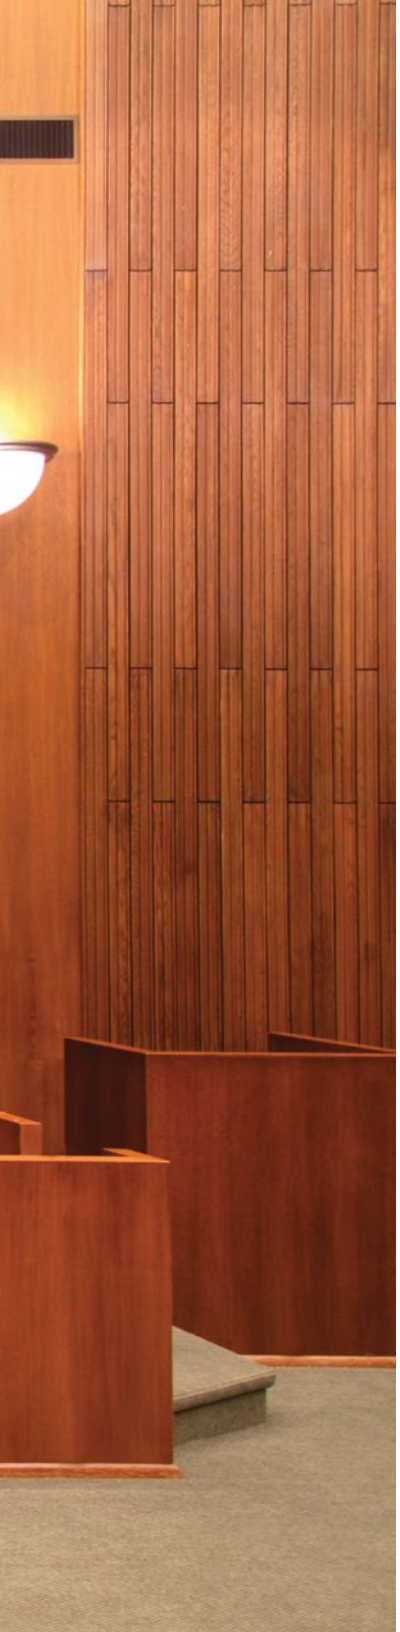
WE TRUST



INTRODUCTION

For more than 45 years, Crestron has delivered technology solutions that simplify, modernize, and enhance communications and proceedings in courtrooms, increasing jury engagement, while decreasing trial costs.

Our secure, scalable, easy-to-deploy solutions are thoughtfully designed to help you meet the wide range of operational needs of every type of courtroom, including hybrid environments, as well as your meeting and training spaces.

All of our products are designed to work together as a complete secure system, rather than a collection of unrelated parts housed in technology silos. That means just one number for you to call for all service and support.

- Native Microsoft Teams® or Zoom Rooms™ video conferencing, plus support for any conferencing platform, optimizes communication and collaboration
- Scalable audio, video, and KVM distribution ensures instantaneous, flawless content delivery everywhere you need it
- Intuitive user interfaces deliver a simple, consistent experience in every courtroom
- Cloud-based monitoring and management platform speeds technology deployment and increases uptime
- Advanced room scheduling helps you keep operations running smoothly and efficiently

THE CRESTRON DIFFERENCE

Build

Take advantage of our free design services or work with one of our dealers or consultants. Either way, you can count on courtrooms in which every voice, visual, or piece of evidence is clearly seen and heard, every time, no matter where it's presented; at the bench, podium, or from the jail.

Crestron Flex video conferencing solutions

With a native Microsoft Teams or Zoom Rooms experience and BYOD support for any conferencing platform, Crestron Flex solutions give you the ability to bring remote participants into the courtroom with just a single touch. From expert witness testimony, to remote arraignment hearings, your courtrooms will seamlessly blend in-person and remote participation.

DigitalMedia™ 4K video, audio, KVM, and USB distribution platform

Everything people see, hear, and interact with in courtrooms — evidence presentation and witnesses' testimony — is of paramount importance. With DigitalMedia, you have complete control over who sees or hears what content and when. And it's all delivered securely and flawlessly, down to the last pixel.

AirMedia® wireless content presentation

Digital content can come from anywhere: a laptop, tablet, or mobile device. Leveraging your secure network, and with support for every OS, AirMedia makes it simple and safe. Just follow the simple on-screen instructions. No plugs, cables, or adapters needed.

DEPLOY AND MANAGE

Technology evolves quickly. The ability to simplify and speed deployment and updates, as you remotely monitor performance and respond to issues in real-time, is critical to maintaining a smoothly running operation.

XiO Cloud® technology deployment, monitoring, and management platform

Every moment matters in the courtroom, so your technology must work. And if it doesn't, the issue needs to be resolved as rapidly as possible. With the award-winning XiO Cloud platform, you can:

- Efficiently pre-configure and deploy new technology at scale
- Silently push out updates to ensure your courtrooms are secure and running optimally
- Monitor all your technology in real-time from within your courthouse or district
- Detect and proactively resolve issues – often before they become issues
- Gather usage data to help make smarter decisions

EXPERIENCE

Courtroom dockets are packed every day. There's no time to waste figuring out how to get the technology to work. Crestron technology adapts to the way you work and integrates seamlessly with the technology you're already using. The end result is an intuitive and consistent experience in every courtroom, so you can get right down to business.

Crestron technology solutions are deployed in thousands of courtrooms across the globe: Supreme, District, Court of Appeals, County, Civil, Circuit and Bankruptcy.

Touch screens

Court proceedings have a well-defined process and workflow. Crestron touch screens give you the ability to provide exactly the right control to those who need it. Route content to displays, mute microphones, bring in remote participants, and more.

Room scheduling

Crestron room scheduling drives efficiency by allowing you to locate and schedule available rooms with ease. Book courtrooms, meeting spaces, and training areas from your desktop or on the go from your mobile device. Touch screens and illuminated hallway signs outside each room provide a convenient touch point to schedule ad-hoc meetings, view room schedules, or to simply find your meeting.

GOVERNMENT SUPPORT SERVICES PARTNER PROGRAM

We understand time is of the essence for our government partners. Our Government Support Services (GSS) Partner Program will never leave you waiting.

- Dedicated Partner Manager will guide you through the design, specification, and procurement stages to ensure seamless system implementation
- Direct RMA, including Advance Replacement on eligible Crestron products during warranty period[1,2]
- Immediate access to Crestron software, application diagrams, and more at crestron.com
- Access to Crestron Technical Institute (CTI) online and in-classroom training curriculum
- Direct, dedicated, 24/7/365 technical support hotline at 855.445.6097
- Direct, dedicated technical design assistance at 800.237.2041
- Standard three year warranty extended to five years[1,2]
