Taipei's DeBao Mansion Gets Luxurious with Crestron Home Automation Technology

DeBao Mansion is one of the most luxurious residential towers in Taiwan. DeBao commands a stunning panoramic landscape view with international club houses, grand ballrooms and exceptional gardens. Stunningly designed and operated, this tower boasts integrated Crestron home automation technology throughout to control lighting, home theater systems, blinds and security.

With Crestron whole home control technology, DeBao is stunning both inside and out, and a lot more energy efficient.

An array of Crestron touchpanels and handhelds provide convenient touchscreen control from anywhere in the home and include SmarTouch STX-1700C 6" and MiniTouch MT-1000C 3.8" wireless touchpanels. A TPS-2000L wall mount touchscreen is centrally located for flexibility, and an ML-600 handheld remote completes the versatile user interface options.

Crestron CLSI-C6 and CLSI-C6M iLux integrated lighting systems and MC2E and AV2 control processors provide seamless, whole home automation of all home systems. Combined with the wide selection of interfaces, residents have touchpanel control of the home theatre system, multi-room audio/video distribution, programmed lighting control, shades/blinds, and security, which includes interior and exterior CCTV and door entry sub-systems.

With just a single touch on the touchpanels, the lights dim, the shades close, and the TV powers on. Using Crestron eControl, residents can also control and manage all the equipment in the home from anywhere, using a Web browser or mobile device,

The iLux lighting control system allows convenience and energy savings, while enabling occupants to choose the perfect scene from many customized presets, and create the desired ambiance for any occasion, such as movie night, dinner, party and bedtime. Window treatments are also programmed to adjust at preset times to reduce glare and protect delicate fabrics from harmful direct sunlight. Additionally, lights are programmed to dim according to ambient light levels, season, time of day, and occupancy.

With Crestron whole home control technology, DeBao is stunning both inside and out, and a lot more energy efficient. With the many factors involved in high end luxury property development, Crestron home technology provides the award-winning finishing touch.
