DM NAX® AUDIO EDGE DEVICES

Get an edge on entertainment everywhere.

Put an end to complicated setups and get the show started — on the network, through any device. From cord-free Bluetooth® communications to plugged-in professional equipment, Crestron DM NAX Audio Edge Devices meet the customer's needs for flexibility and simplicity, making entertainment even more accessible.

All four models have unique features that enhance the AV-over-IP experience and fit perfectly into any AV-over-IP system. More choices give you even more seamless and simple network content distribution throughout the entire home.

KEY BENEFITS

- PoE powered — no local AC required
- Seamless and interoperable audio-over-IP solution
- Compatible across DM NVX® AV-over-IP, DM NAX® audio-over-IP, AES67, and Dante® audio networking platforms
- Hassle-free installation and connectivity
- Crestron Home® OS support
- Onboard DSP
- Two different form factors offer the perfect fit for any AV environment

CRESTRON®
