

Dual Bus Control Systems: AV2 and PRO2

Purpose

The purpose of this addendum is to update information in the AV2 and PRO2 Operations Guide (Doc. 5957). Specifically, the storage capacity of the expansion slot for Compact Flash memory cards is 2 GB (not 4 GB).

Features and Functions

On page 1, the Compact Flash bullet should read as follows:
“2 GB Compact Flash memory card slot.”

Memory Expansion

On page 2, this paragraph should read as follows:
“A memory card slot accessible on the rear panel allows for easy expansion of the AV2’s and PRO2’s internal memory using any Type II Compact Flash memory card up to 2 GB.”

Specifications

On page 3, in the “Memory” section of the specifications table, “Compact Flash” should read as follows:
“Expandable up to 2 GB (not included).”

Memory Card Installation

On page 12, this paragraph should read as follows:
“The onboard 36 MB memory of the 2-Series integrated dual bus control system is enhanced with a 2 GB expansion slot that supports off-the-shelf Type II Compact Flash memory and microdrive devices.”
