

## TSD-2020-PMK

### Pre-Construction Wall Mount Kit for TSD-2020-WMK-BB

#### DO Install the Device

The Crestron® TSD-2020-PMK consists of a single metal plate that fastens to two studs of a framed wall prior to hanging drywall. Standard drywall screws or nails to attach the TSD-2020-PMK are not supplied.

The plate is designed to provide the necessary support for the TSD-2020-WMK-BB Wall Mount Kit and Back Box (sold separately).

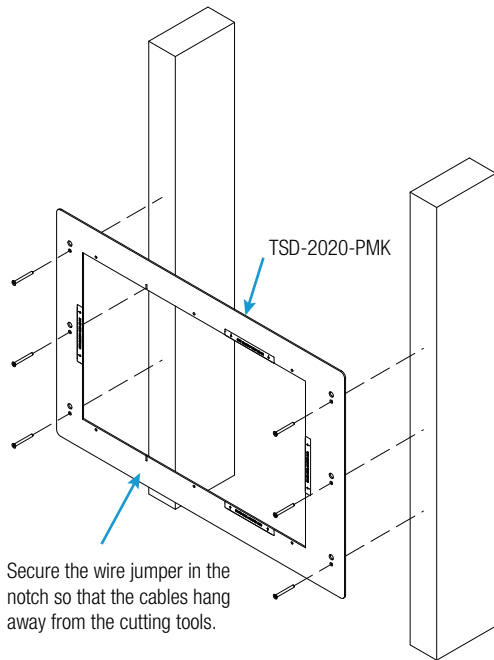

To install the device, do the following:

1. Position the plate against the front edges of the studs.

**CAUTION:** Allow an air gap of at least 12 inches (305 mm) in the wall cavity above and below the TSD-2020-PMK for heat dissipation.

2. Attach the plate to the studs using standard drywall screws or nails (not supplied).

Mounting the TSD-2020-PMK

3. Position the drywall over the TSD-2020-PMK.

4. Cut a rectangular opening in the drywall to expose the six 06-32 tapped holes shown in the illustration to the right.

#### DO Check the Box

QTY	PRODUCT	COLOR	PART NUM.
1	Metal Cover Plate, Blank		2041923
6	Screws, 06-32 x 1 1/2"		2007254
1	Wire Jumper	Black	2007838

**NOTE:** Cut the drywall along the inside edge of the mounting plate. The labels on the front of the mounting plate indicate the perimeter of the opening that should be cut.

**NOTE:** The six tapped holes on the front of the mounting plate must be exposed in order to accept the TSD-2020-WMK-BB mounting screws. These holes are found along the top and bottom of the drywall opening.

5. Complete the installation by installing the optional cover plate with the included 06-32 x 1 1/2" screws, installing the TSD-2020-WMK-BB, or leaving the hole open (if permitted by local building codes).
