

Manufacturer: Crestron
Model Number: CCS-UC-1
Description: Speakerphone device
Technical Point of contact: Michael Tumarinson
Title: Project Engineer
Phone: 2017507004
Email address: mtumarinson@crestron.com
Date (M/D/YYYY): 10/18/2017

Crestron Electronics, Inc.

Statement of Memory Volatility for CCS-UC-1

Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off Note 1	User data Note 2	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1.SDRAM	16 Giga Bits	Temporary Storage	No	No	Special software required	
2.SRAM	128 kilo Bytes	Temporary Storage	No	No	Special software required	
3.SD CARD Internal	8 Giga Bytes	Firmware	Yes	No	Special software required	N/P
4.EEPROM	16 Mega Bits	System Config	Yes	No	Special software required	Software
5.EEPROM	4 Mega Bits	Firmware	Yes	No	Special software required	Software
6.EEPROM	8 kilo Bits	System Config	Yes	No	Special software required	Software
7.EEPROM	4 Mega Bits	System Config	Yes	No	Special software required	Software

(User is defined as end user who ultimately operates this device)

Note 1: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet be retained after power down?

Note 2: Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.

Name, Title
