

## Statement of Memory Volatility for CEN-SWPOE-16

### Volatile and non-volatile memory information/configuration:

Type of Memory	Size of Memory	Purpose of this Memory	Data retention after power off <b>Note 1</b>	User data <b>Note 2</b>	How is data input to this memory?	How is memory protected from accidental overwrite by the user? (e.g. Password, Jumpers, Switch settings, Software) - Enter N/P if it can't be write protected.
1.EEPROM Within Processor	1 Mega Bytes	Firmware System Config	Yes	No	Special software required	Software
2.SRAM Within Processor	128 kilo Bytes	Firmware	No	No	Special software required	Software
3.< >	kilo<>	< >	<>	<>	< >	

**Note 1:** Can user data, i.e. Audio, Video, documents (Word, pdf etc.) or spreadsheet retain after power down?

**Note 2:** Can user data, i.e. Audio or Video, documents (Word, pdf etc.) or spreadsheet be written to this memory during normal operation? User settings and operational parameters such as volume setting, IP address etc. are not considered User data on this declaration. Only Audio, Video, documents (Word, pdf etc.) or spreadsheet is considered user data.
