Crestron® PinPoint™ App

## Meeting Management for the Intelligent Enterprise

> Proximity-based meeting space scheduling and control app for users within the Crestron Fusion® enterprise

> Integration with PP-100 Proximity Detection Beacons for location-based functionality

> Highly customizable meeting space searches

> Capabilities, features, and pictures for each meeting space within the app

> Meeting space booking with the ability to invite attendees

> All available room controls presented to the user when entering that space

> One-touch AirMedia® control capabilities

> Intuitive user interface

> At-a-glance schedule information

> Notifications about upcoming meetings

> Countdown timers for each meeting's start and finish

> No processor reprogramming

The Crestron® PinPoint™ App brings unparalleled daily operational fluidity to every user within the Crestron Fusion® enterprise. The Crestron PinPoint App, Crestron Fusion, and PP-100 Proximity Detection Beacons work synergistically to cut through the administrative tasks that plague your working day, making it the ultimate intelligent enterprise solution for maximum time management. Use the app to quickly find the meeting space that best suits your needs, book the room, and then invite attendees without ever touching your laptop. Walk into a space and instantly access the controls available in it. Time spent fiddling with physical connections is a thing of the past when you can present wirelessly over AirMedia with just one tap. With the PinPoint App, you can get down to business as soon as a meeting begins. It is more than a space management and connectivity app – it is a personal, customizable tool for increasing your daily productivity.

Your Day, Simplified

Use the app's straightforward user interface to enhance your time management. The home screen provides at-a-glance information such as the number of meetings you have that day, schedule conflicts, and notifications about upcoming meetings. A handy timer next to each meeting counts down the time until that meeting begins or ends. Know instantly if you have enough time to address that last talking point or if you need the extra time to get to the next meeting. Tap on a meeting to see detailed information about where it is and who is attending or to conference call in to the meeting. The minimalistic, intuitive user interface is easy to navigate and it enables you to quickly find exactly what you need. You can even customize the order in which information appears. Productivity is no longer held up by searching, scanning, and scrolling – with the PinPoint App, efficiency is at your fingertips!

Optimized Searches

Finding a meeting space that's available, has the equipment you need, and is closest to your current location is easier than ever! Customized searches produce meeting spaces that exactly fit your needs. Seating capacity, room features and capabilities, displays, conference-calling capabilities, and more can all be specified in your search. Save your frequent searches or flag your favorite spaces to check their availability first in your next search. The app supports meeting spaces of all types, from conference rooms and boardrooms to huddle spaces and meeting areas within a larger room. If you aren't sure a meeting space will work for you, simply browse the photos of that space within the app. Crestron PinPoint also provides you with a map of the floor so you can plan the best route to your meeting.

Once you find a meeting space that satisfies all of your needs, book it from within the app. You can then search for and invite attendees to the meeting, all without leaving the app! Whether it's an ad-hoc booking for those last-minute meetings that just can't wait or a future meeting that you need to arrange while you're on the road, Crestron PinPoint handles it all.

CRESTRON®

Instant Integration

Begin your meeting with maximum efficiency and waste less time on setup. Once the proximity detection beacons register your presence in the meeting space, the app presents you with all the controls available for that space, such as connecting to an AirMedia device for a wireless presentation. The simple, one-touch AirMedia connection eliminates the time wasted searching for a specific IP address and scrolling through a list of devices. Use the app's intuitive user interface to effortlessly control the space and enable your meeting to get under way with a minimum of distractions.

Crestron Fusion Functionality

The PinPoint App takes the powerful meeting space scheduling and energy saving tools of Crestron Fusion to the next level. Implementation of this state-of-the-art app is as easy as creating login credentials and downloading the software for each user. Because it works in conjunction with Crestron Fusion, there is no need to reprogram any processors.

PinPoint Proximity Detection Beacons (PP-100)

Crestron PinPoint Proximity Detection Beacons enable your mobile device to always know what room it's in or where you are headed. The beacons pinpoint your device's location so that it can automatically communicate with the equipment in the meeting space. With PinPoint beacons, there's no need to manually select your current meeting space from a menu — your device always knows where it's at.
