

## Crestron Lighting Controls Provide Luxurious Ambiance at Tianjin Metropolitan International Polo Club

### Background

Metropolitan International Polo Club is the largest and most prestigious polo field in China. As one of the most expensive private clubs in Tianjin, the exclusive club includes two international standard size polo fields, an indoor sport playing field, a stable capable of housing 150 horses, and a luxury hotel with 160+ guest rooms. Members of Metropolitan

International Polo Club can enjoy major international events and activities, while also experiencing a luxurious getaway.

The elite facility also offers members and guests a wide-range of accommodations, luxury and entertainment,

---

The Crestron intelligent lighting control system covers nearly all the public areas, including the executive lounge, wine museum, library, conference rooms, business center, spas, and gym.

---

including a wine museum with more than 10,000 bottles of red wine, a cigar bar, a dozen restaurants and pubs to choose from, and two spa centers. A banquet hall holds more than 1,000 guests, plus five fully-equipped, multiple purpose conference halls that provide plenty of space for meetings and special events. Lighting control throughout the facility is handled by a Crestron GreenLight® system.

### Lighting In Common Areas

The lobby is the first area where guests experience the unique amenities of the hotel. The advanced lighting control system from Crestron features dimming that creates a luxury ambiance, and depending on the outdoor conditions, adjusts to conserve energy.

The Crestron intelligent lighting control system covers nearly all the public areas, including the executive lounge, wine museum, library, conference rooms, business center, spas, and gym. Since Metropolitan International Polo Club is a multi-functional facility, it requires a lighting control system to match the diverse needs of guests and management. Crestron created a variety of lighting settings to allow management to adjust the lighting in area with one tap of the button.

### Fine Dining & Lighting

Crestron lighting controls are installed in every restaurant in the hotel. The moment guests enter the restaurant they are treated to an exquisite visual experience, with the help of lighting effects. The system features a variety of lighting options for different needs, including breakfast, lunch, dinner, full light, rest and even a cleaning mode.

### Benefits

The management team realizes that aside from providing a comfortable environment for guests, energy and cost savings are extremely important as well. With Crestron, the facility saves money and resources with an automated lighting solution.
