1. Pick a desirable location to mount the **CPC-WMT** (hardware not supplied). Ensure that the mounting surface can support the weight of the camera/mount assembly. Make sure the location allows for full movement of the camera/lens assembly.

---

**NOTE:** A template (latest revision of DOC. 5770) is supplied to properly locate the three **CPC-WMT** mounting holes.

---

2. Mount the **CPC-CAMI** to the **CPC-WMT** using the two 1/4-20x1/2 inch screws (supplied).

---

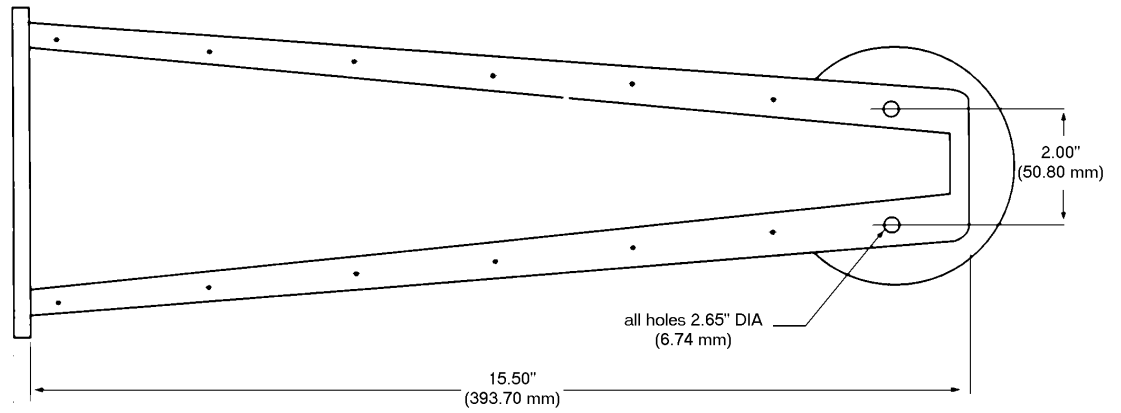

**NOTE:** It is important to provide a free loop of cable when installing a moving camera/lens assembly. Provide enough excess cable to allow the camera to move freely through its range. This practice reduces strain on the **CPC-CAMI** and can extend motor life.
