Installation

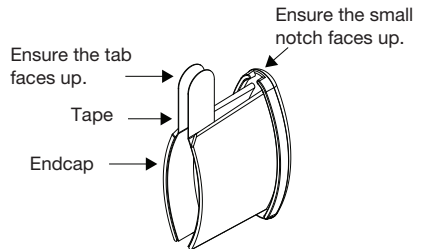

WARNING: CHOKING HAZARD – SMALL PARTS.

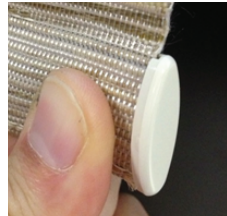

This package contains small parts that could detach or break and become a **choking hazard** to children. These parts must be installed properly according to the below instructions. **Any and all risk is assumed by the installer.**

Follow the procedure below to install the endcaps:

1. Ensure that the small notch and the tape on the endcap face up.

2. Remove the backing from both pieces of tape by pulling down on the tab that extends from the endcap.
3. Fully insert the endcap into the hem pocket and over the hem bar.
4. Repeat steps 1 through 3 for the other end of the hem bar.
5. Apply pressure to both sides of the endcap to ensure that the tape is making contact with the hem bar. Repeat for the other end of the hem bar.

6. Tape requires 24 hours to fully cure. After 15 minutes, gently pull on the endcaps to ensure that the tape has set. If endcaps come off with little effort, contact Crestron for replacements.

WARNING: Failure to perform step 6 correctly may result in the endcaps falling off, posing a choking hazard to children.

As of the date of manufacture, the Roller Shade Hem Bar Endcaps have been tested and found to comply with specifications for CE marking.
