

SolarSync Compatibility Guide

Brand Guidelines

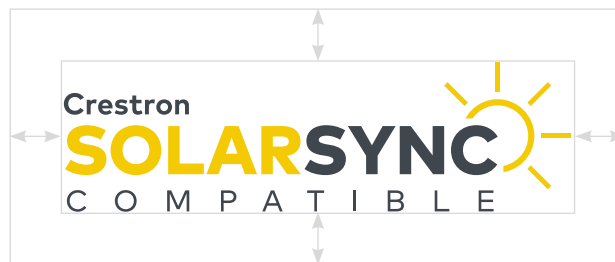

SOLARSYNC LOGO

The logo is made up of the SolarSync wordmark and yellow shining sun icon. Crestron must appear above the logo, while 'Compatible' always appears below. Do not extract or exclude any element from this logo.

USAGE RULES

This logo is only to be used on a light background, either white or light grey, so that it's always legible on either print or screen. Always retain clearspace around the logo (shown below).

Other rules:

- Logo should be placed in the compatibility or partner section, or otherwise associated with the product model number rather than within a specific spec or feature description.
- **Logo must be shown alongside the following copy, either in a paragraph near the logo or as a footnote:** "Compatible with DALI-based Crestron lighting control systems that include SolarSync. Crestron products sold separately."
