CSS-ARCH-MANUAL-SINGLE

Architectural Manual Shades, Single Roll

Versatile chain-operated shade for ceiling, wall, or jamb mounting

Curved or square fascia with optional top back cover

Decorative end caps come in a variety of finishes

NOTE: "CSS-ARCH-MANUAL-SINGLE" is sold as part of a custom-configured product and orders are placed via the Crestron® Design Tool for Crestron Shading Solutions. This specifications page is for informational purposes and shows the available parts of an Architectural Manual Shade. To configure shades or order shading parts and accessories, please use the Crestron Design Tool for Crestron Shading Solutions or call 1-855-53-S-H-A-D-E (537-4233) for support.

An Architectural Manual Shade from Crestron® is designed for use in situations where concealing the roller shade is desirable. The roller shade is chain-operated for easy movement and offers optional decorative extrusions that complement a room's decor. An Architectural Manual Shade is capable of ceiling, wall, and jamb mounting.
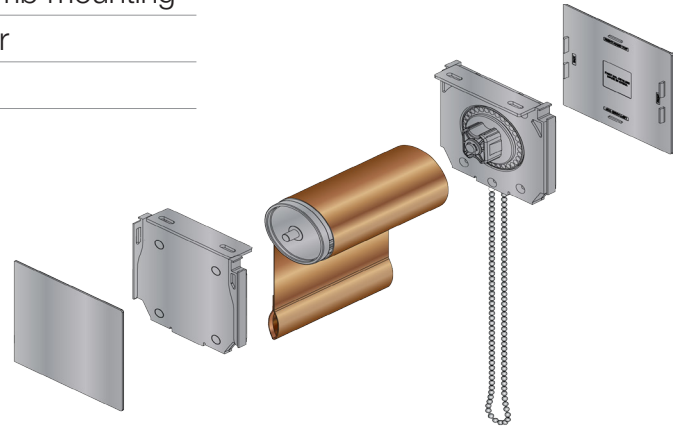

Brackets
The shade is assembled using the supplied mounting brackets. The Architectural Manual Wall Brackets (or "L" brackets) are secured to an appropriate mounting surface, a ceiling or wall, for example, by provided screws. The clutch and idler brackets attach to the L brackets and are responsible for holding the roller shade assembly in place.
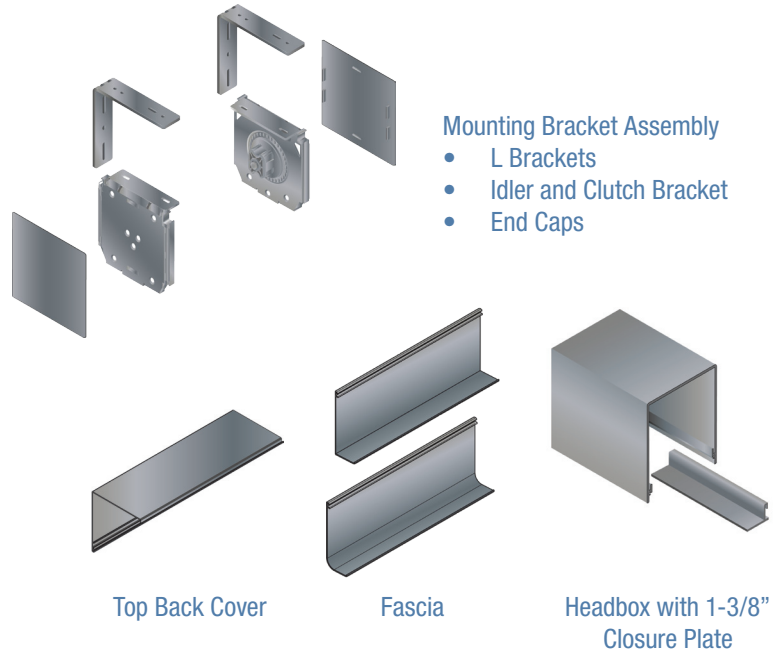

Fascia & Top Back Cover
Architectural fascia can be square or curved and snaps into place onto the clutch and idler mounting brackets. Fascia both camouflages the roller shade and allows access for adjustment and maintenance. A top back cover is available with the fascia as part of a two-piece assembly and is suitable for surface mounting to a header, jamb, or wall. End caps are curved or square to match the fascia design.

Chain & Chain Tension Device
The chain that operates the shade comes standard in a stainless steel finish. A chain tension device (or "chain guide") ensures the chain is kept in place and does not interfere with

Headbox Caps	Designed to match headbox			Plastic; White, Ivory, Clear Anodized, Black, Bronze

NOTE: Actual maximum shade size is dependent on fabric chosen.

shade operation. It secures to the wall, window frame, or floor to remove slack from the chain. Setting upper and lower limits of the shade is done with stop balls, which are installed onto the chain.

Crestron Shading Solutions Safety Information
Crestron's manual shades are sold with a chain tension device connected to the shade's looped operating chain. If the chain tension device is not attached to the wall or floor, the shade will not function properly.

A chain tension device reduces the risk of a young child becoming entangled in the operating chain. This device should be used with all looped operating chains on window shades in any environment in which children are or may be present.

Crestron is committed to providing customers with products of the highest quality and workmanship. Safety is important to us, and we are proud to say that safety issues are rare. We will continue to work with organizations such as the Window Covering Safety Council to identify areas where products can benefit from enhanced safety features.

The Window Covering Safety Council (WCSC) and the U.S. Consumer Product Safety Commission (CPSC) are recommending that only cordless window coverings or those with inaccessible cords be used in homes with young children.

Important Safety Guidelines can be found at
www.windowcoverings.org

⚠WARNING

The cords on this product present a potential strangulation hazard.

For child safety, consider cordless alternatives or products with inaccessible cords.

⚠ ADVERTENCIA

Los cordones de este producto representan un peligro potencial de estrangulamiento.

Para la seguridad de los niños, utilice alternativas sin cordón o productos cuyos cordones sean inaccesibles.

⚠ MISE EN GARDE

Les câbles de ce produit représentent un danger potentiel de strangulation.

Pour la sécurité des enfants, pensez au sans fil, ou procurez-vous des produits dont les câbles ne sont pas accessibles.
