DMPS Lite

The DMPS Lite product line gives you a complete, high value **multisource-to-display** AV solution for classrooms, huddle rooms, and small collaboration rooms. It expands your reach into spaces that require more than a DM Lite™ **source-to-display** solution alone, but less than a DMPS3 Series system.

ALL OF THE BENEFITS OF DM LITE PLUS:

- 4K video scaler
- Standalone web configuration with auto-routing and display control
- Ability to upgrade and monitor via Crestron XiO Cloud® service
- Audio amplification (410 and 510 models only)
- Fits your existing infrastructure – no new wires to run
- Improved network connectivity for high-traffic networks

Crestron **XiO CLOUD**™ | .AV Framework™

DMPS Lite 210 Kits

Paired with our most popular DM Lite transmitters to give you more input options in various form factors, the DMPS Lite 210 Kit line-up includes everything you need to create simple, yet powerful AV spaces – in 2x1, 3x1, or 4x1 switching solutions.

Simple, repeatable configuration

Design once using .AV Framework™ software. Deploy at scale via XiO Cloud. Deliver a consistent UI and user experience on every system in every room, so anyone can easily use it.
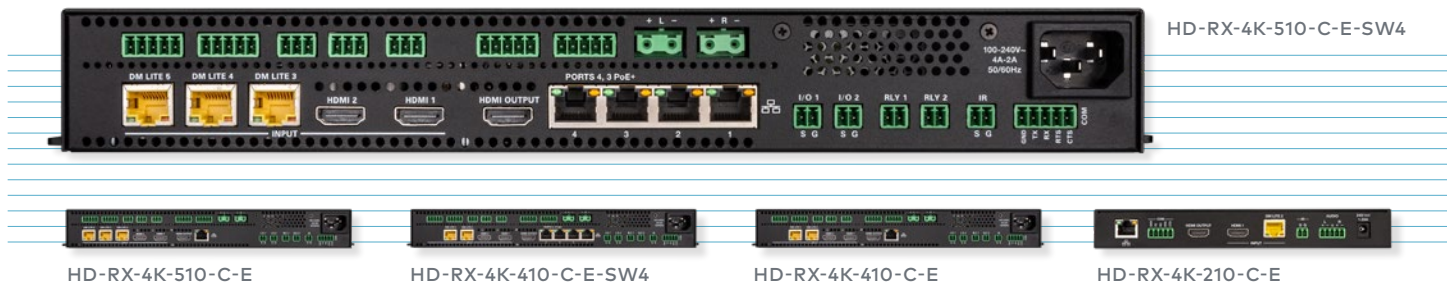

Fully interoperable and scalable

DMPS Lite products are interoperable with DM Lite and the Crestron family of peripheral products. So, it's easy to mix-and-match to build out your complete room solutions.
